

Table of Contents

Introduction	vii
Acknowledgments	xi
Canis Minor	1
Notable Stars in Canis Minor	4
Procyon, Alpha (α) Canis Minoris	4
Gomeisa, Beta (β) Canis Minoris	11
Luyten's Star	16
Galactic Objects in Canis Minor	17
NGC 2394	17
Dolidze 26	20
ADS 6366	21
NGC 2459, NGC 2433, and IC 473	22
NGC 2459	22
NGC 2433	23
IC 473	25
Extragalactic Objects in Canis Minor	25
NGC 2350	25
NGC 2470	26
NGC 2485	27
Looking toward Canis Minor through the Milky Way	29
Looking through Canis Minor: The Extragalactic View	29
Capricornus	31
Notable Stars in Capricornus	35
Algedi, Alpha (α) Capricorni	35
Dabih, Beta (β) Capricorni	38
Deneb Algedi, Delta (δ) Capricorni	40
Galactic Objects in Capricornus	44
M30	44
Extragalactic Objects in Capricornus	51
NGC 6907 and NGC 6908	51
NGC 7103	56
Looking toward Capricornus through the Milky Way	60
Looking through Capricornus: The Extragalactic View	61
Carina	63
Notable Stars in Carina	77
Canopus, Alpha (α) Carinae	77
Miaplacidus, Beta (β) Carinae	81
Epsilon (ϵ) Carinae	83

Eta (η) Carinae	84
The Great Eruption	88
Eta Carinae as a Luminous Blue Variable	93
Eta Carinae Reveals Itself	95
Structure within Structure	100
Fluctuations, Periodicities, and the Reality of a Companion	104
The Homunculus in 3-D	110
The Cause of the Great 19th-Century Eruption	113
Light Echoes from the Great Eruption	118
Eta Carinae's Laser Emission	120
The Fate of Eta Carinae	122
Theta (θ) Carinae	127
Upsilon (υ) Carinae	130
I Carinae	131
Galactic Objects in Carina	134
NGC 3372, The Carina Nebula	134
Stellar Content: Globulettes, Previous Supernovae, and EGGs.	143
The Keyhole Nebula, Eta Carinae, and Surrounding Clusters	150
NGC 2516	159
NGC 3532	161
NGC 2867	164
NGC 3293	167
NGC 3576 and NGC 3603	170
NGC 3199	179
NGC 3247 / Westerlund 2	181
NGC 2808	184
Extragalactic Objects in Carina	191
IC 2554 and NGC 3136B.	191
NGC 3136	195
NGC 3059	196
Looking toward Carina through the Milky Way.	199
Looking through Carina: The Extragalactic View.	200
Cassiopeia	203
Notable Stars in Cassiopeia	210
Schedar, Alpha (α) Cassiopeiae	210
Caph, Beta (β) Cassiopeiae	212
Gamma (γ) Cassiopeiae	214
Ruchbah, Delta (δ) Cassiopeiae.	225
Segin, Epsilon (ϵ) Cassiopeiae	225
Achird, Eta (η) Cassiopeiae	226
Marfak, Theta (θ) Cassiopeiae	229
Iota (ι) Cassiopeiae.	230

Mu (μ) Cassiopeiae	233
Rho (ρ) Cassiopeiae	235
Sigma (σ) Cassiopeiae	240
R, S, T, and V Cassiopeiae.....	241
R Cassiopeiae.....	243
S Cassiopeiae	245
T Cassiopeiae	247
V Cassiopeiae	248
AO Cassiopeiae.....	248
RZ Cassiopeiae	251
HD 7924.....	254
Galactic Objects in Cassiopeia	256
IC 289	256
M52.....	259
IC 1805.....	260
NGC 663	267
NGC 654	273
M103.....	280
NGC 457	282
NGC 637	287
NGC 281	290
Tycho’s Star (3C 10; SN 1572).....	295
Early Research	299
SN 1572 as a Type Ia Supernova	301
Evidence for a Companion	304
The Fundamentals of Supernova Types.....	308
Tycho Brahe and the Dawn of Modern Observational Astronomy	312
NGC 7635	318
Cassiopeia A.....	326
The Search for the Date of the Cas A Event	328
Cassiopeia A and the Dawn of Radio Astronomy	335
The Optical Remnant, Light Echoes, and Jet	343
Visual Observations of the Cas A Supernova Remnant	349
Backyard Searches for Light Echoes.....	351
Extragalactic Objects in Cassiopeia	351
NGC 185	351
NGC 147	351
Maffei 1 and 2	359
NGC 278	363
Figure Acknowledgments	369
Index.....	377

Rev. T. W. Webb pursued a disciplined observation program lasting 60 years. In 1859, he published *Celestial Objects for Common Telescopes* which was revised and reprinted as late as 1962. He used several telescopes over his life, the largest represented at right, a 9.25" $f/8$ With-Berthon reflector, potentially still functional as the British Astronomical Association's "Instrument 83." (Courtesy Denis Buczynski)
