

Table of Contents

Acknowledgements	xi
Introduction	xiii
Chapter 1 Getting Started	1
1.1 The Amateur's Telescope	1
1.2 Mechanical and Optical Characteristics	3
1.2.1 Lens Design	3
1.2.2 Ordering Glass	3
1.2.3 Lens Cell Design	4
1.2.4 Modify the Lens Design	4
1.2.5 Pre-form the Blanks	4
1.2.6 Grind the Lenses to Shape	5
1.2.7 Optical Flats (Optional)	5
1.2.8 Fine Grinding	5
1.2.9 Polish the Lenses	6
1.2.10 Lens Cell	6
1.2.11 Testing and Figuring	6
1.2.12 Tube Assembly	7
Chapter 2 Some Necessities	9
2.1 Work Area	9
2.1.1 The Grinding Stand	10
2.2 Tools	12
2.2.1 Essentials	12
2.2.2 Desirable	13
2.2.3 For Edging Blanks	14
2.3 Materials and Supplies	14
2.3.1 Optical glass	14
2.3.2 Grinding Materials	14
2.3.2.1 Four Plate Glass Tools	14
2.3.2.2 Abrasives and Pitch	15
2.3.3 Other Useful Things	16
2.4 Miscellaneous	16
2.4.1 Safety	16
2.4.2 Your Notebook	16
Chapter 3 Glass, Abrasives, and Pitch	19
3.1 Glass	19
3.1.1 Glass Composition	19
3.1.2 Glass Manufacture	21

iv Table of Contents

3.1.3 Annealing	21
3.1.4 Glass Properties	22
3.1.4.1 Mechanical Properties	23
3.1.4.2 Chemical Properties	23
3.1.4.3 Optical Properties	24
3.1.4.4 Other Properties	25
3.1.5 Forms of Supply	28
3.1.6 Buying Glass	28
3.1.7 Sources	30
3.2 Abrasives	31
3.2.1 Abrasive Materials	31
3.2.1.1 Grinding Abrasives	31
3.2.1.2 Polishing Abrasives	33
3.3 Pitch	34
3.3.1 Background	34
3.3.2 Properties	35
3.3.3 Tempering Pitch	38
3.3.4 Safety	40
Chapter 4 Working with Glass	41
4.1 Heating and Cooling Glass	41
4.2 Bevel an Edge	41
4.3 Grinding	43
4.3.1 Accented Pressure	45
4.3.2 Checking for Contact	45
4.4 Grinding Strokes	46
4.4.1 Center-Over-Center Stroke	46
4.4.2 Overhang Stroke	47
4.4.3 Zig-Zag or “W” Stroke	47
4.4.4 Radial Stroke	48
4.4.5 Circular or Orbital Stroke	48
4.5 The Grinding Process and the Ground Surface	48
4.5.1 How Much Glass Is Ground Away?	50
4.5.2 What Does This Mean?	52
Chapter 5 Measuring Techniques	55
5.1 Measuring Lens Diameter	55
5.2 Measuring Edge Thickness	56
5.2.1 Dial Indicator Method	57
5.2.2 Micrometer or Caliper Method	58
5.3 Measuring Center Thickness	60
5.4 Measuring Lens Surface Radius	61
5.4.1 Candle Test (Concave)	62
5.4.2 Gauge Wire Test (Concave)	62
5.4.3 Dial or Vernier Caliper Test (Concave)	63
5.4.4 Template Test (Concave or Convex)	63

Table of Contents v

5.4.5 Spherometer Test (Concave or Convex)	63
5.4.6 Image Test (Concave)	66
5.4.7 Test Plates (Concave and Convex Polished Surfaces)	67
Chapter 6 Edging and Grinding to Shape	69
6.1 Edging	69
6.1.1 Centering and Edging Finished Lenses	76
6.1.2 Mounting the Lens	77
6.1.3 Centering the Lens	78
6.1.4 Edging the Centered Lens	79
6.2 Establish Uniform Edge Thickness	79
6.3 Grinding to Shape	82
6.3.1 Target Values for Rough Grinding	82
6.3.2 Rough Grinding Details	83
6.3.2.1 Rough Grind Surface R_3	83
6.3.2.2 Rough Grind Surface R_4	88
6.3.2.3 Rough Grind Surface R_2	89
6.3.2.4 Rough Grind Surface R_1	90
6.4 Cemented or Equal Radius Doublet	91
6.5 Cleanup	91
6.6 Reminders	92
Chapter 7 Fine Grinding	93
7.1 General Notes	93
7.2 Fabrication Tolerances	94
7.3 Fine Grinding Details	97
7.3.1 Fine Grinding with 120 Grit	97
7.3.2 Fine Grinding with 220 Grit	99
7.3.3 Fine Grinding with Finishing Grades	100
7.3.4 Final Grinding Steps	101
Chapter 8 Laps and Polishing	103
8.1 Working with Pitch	103
8.1.1 Heating and Melting Pitch	104
8.1.2 Cutting Pitch	104
8.1.3 Removing Pitch or Separating Pitched Parts (Freezer Method)	105
8.1.4 Pressing the Lap	105
8.1.4.1 Cold Pressing	105
8.1.4.2 Hot Pressing	107
8.1.5 Remaking a Lap	108
8.2 The Polishing Lap	108
8.2.1 Lap Substrate	108
8.2.2 Forming the Lap	109
8.3 Polishing the Optical Surface	114

vi **Table of Contents**

Chapter 9 Testing Optical Surfaces	119
9.1 How an Optical Surface Affects a Wave Front	119
9.1.1 Light Rays and Wave Fronts	119
9.1.2 Reflecting Surfaces	121
9.1.3 Refracting Surfaces	122
9.2 Test Methods	125
9.2.1 Star Tests	126
9.2.1.1 Testing with an Artificial Star	127
9.2.2 Bench Tests	128
9.2.2.1 Foucault (Knife-Edge) Test	129
9.2.2.2 Ronchi Test	131
9.2.2.3 Eyepiece Tests	134
9.2.2.4 Modified Hartmann Test	135
9.2.2.5 Autocollimation Testing	139
Chapter 10 Testing and Figuring Concave Surfaces	143
10.1 Apparent Surface	143
10.2 Correcting the Surface Figure	146
10.2.1 Accented Pressure, Lap on Top	148
10.2.2 Accented Pressure, Glass on Top	149
10.2.3 Altered Lap, Depressed Center	150
10.2.4 Altered Lap, Depressed Edge	150
10.3 The Corrected Figure	150
Chapter 11 Testing and Figuring the Finished Lens	151
11.1 General Considerations	151
11.2 Interpreting the Figure	153
11.2.1 Star Tests	153
11.2.1.1 Testing Color Correction	157
11.2.2 Bench Tests	158
11.3 Correcting the Figure	160
11.3.1 Turned Edge	161
11.3.2 Incorrect Focal Length	162
11.3.3 Spherical Aberration	166
11.4 A Case Study	168
Chapter 12 Seven Prescriptions	181
12.1 Doublet Lens Forms	181
12.2 Seven Lens Prescriptions	182
12.3 Lens Blanks	185
Chapter 13 Lens Cell and Tube Assembly	187
13.1 Lens Cell Design	187
13.1.1 Design Concepts	187
13.1.2 Cell Materials	192
13.1.3 Mechanical Details	192
13.1.4 Wood Lens Cell	194

Table of Contents vii

13.2	Tube Assembly	196
13.2.1	Tube Length	196
13.2.2	Tube Material	199
13.2.3	Squaring and Cutting Tube to Length	201
13.2.4	Smoothing and Finishing	203
13.2.5	Baffle Design and Installation	204
13.2.6	Final Assembly	205
13.3	Collimation and Balance	206
13.3.1	Collimation	206
13.3.2	Balancing the Tube Assembly	207
13.4	The Mounting	207
Chapter 14 Mirrors, Optical Flats, and Test Plates		213
14.1	Making an Objective Mirror	213
14.1.1	Materials	214
14.1.2	Mirror Fabrication	215
14.2	Optical Flats	216
14.2.1	Materials	216
14.2.2	Glass Selection	217
14.2.3	Rough grinding	217
14.2.4	Fine Grinding	219
14.2.5	Polishing	219
14.2.6	Interference Testing	219
14.2.7	Interpreting the Fringes	225
14.2.8	Quantifying the Test Results	227
14.2.9	Figuring the Flats	228
14.3	Test Plates	231
14.3.1	Making and Using Test Plates	232
14.3.1.1	Test Plate from Lens Grinding Tool	232
14.3.1.2	Test Plate to Fit Convex Surface	233
Chapter 15 Optical Fundamentals		235
15.1	The Nature of Light	235
15.2	Reflection and Refraction	236
15.2.1	Reflection	237
15.2.2	Refraction	237
15.2.2.1	Dispersion	239
15.3	Diffraction and Resolution	240
15.3.1	Diffraction	240
15.3.2	Resolution	243
15.4	Magnification and Light Gathering Power	245
15.4.1	Magnification	245
15.4.2	Light Gathering Power	247
15.4.2.1	Reflection and Lens Coating	248
15.4.3	Image Brightness and Stellar Magnitude	251
15.4.3.1	Point Sources	252

viii **Table of Contents**

15.4.3.2	Extended Sources	253
Chapter 16	Ray Tracing and Third Order Optics	255
16.1	A Little Trigonometry	256
16.2	The CD-ROM	258
16.3	The Ray Tracing Spreadsheets	258
16.3.1	Spreadsheet Organization	259
16.3.2	Sign Conventions	259
16.4	Paraxial Ray Tracing	260
16.4.1	Paraxial Spreadsheet	262
16.4.2	Paraxial Examples	262
16.5	Meridional Ray Tracing	267
16.5.1	Meridional Spreadsheet	269
16.5.2	Meridional Example (Spherical Aberration)	269
16.6	Skew Ray Tracing	272
16.6.1	Skew Ray Spreadsheet	274
16.6.2	Skew Ray Example	276
16.7	Third Order Optics	277
16.7.1	Third Order Aberration Calculation	277
16.7.2	Third Order Aberration Spreadsheet	280
16.7.3	Third Order Aberration Example	280
16.8	Expanding Spreadsheets to More Surfaces	283
Chapter 17	Lens Design	285
17.1	Aberrations	286
17.1.1	Spherical Aberration	286
17.1.2	Coma	287
17.2	Design Details	288
17.2.1	Preliminary Achromat	289
17.2.1.1	Preliminary Achromat Spreadsheet	293
17.2.2	Third Order Thin Lens Design	294
17.2.2.1	Third Order Thin Lens Spreadsheet	296
17.2.3	Lens Thickness and Spacing	298
17.2.4	Achromatization	299
17.2.4.1	Achromatization Spreadsheet	303
17.2.5	Lens Bending	303
17.2.6	Scaling a Lens	308
17.2.7	Significant Figures	310
17.3	Lens Evaluation	310
17.3.1	Spherical Aberration and Color	312
17.3.2	Longitudinal Chromatic Aberration (Axial Color)	313
17.3.2.1	Coma	314
17.4	Aberration Tolerances	315
17.5	Cemented Lens Design	316
17.6	Glass Blank Design	317
17.6.1	Blank Diameter	317

Table of Contents ix

17.6.2 Blank Thickness	317
17.6.3 Vendor Allowances	319
17.6.4 Lens Blank Design Spreadsheet	319
Appendix A Three Novel Null Tests for Refractors	321
A.1 Method 1	323
A.2 Method 2	324
A.3 Method 3	327
A.4 The Spreadsheets	329
A.5 Review	329
A.6 Worked Examples	330
A.6.1 Method 1 (Element Re-Spacing)	330
A.6.1.1 Notes on the Steps	330
A.6.2 Method 2 (Design Alteration)	334
A.6.3 Method 3 (Null Lens)	335
A.6.3.1 Procedure Summary	335
A.6.3.2 Notes on the Procedure Steps	337
A.7 Summary	338
Appendix B Cementing Lenses	341
B.1 “Cementing” Lenses using an Oil Interface	342
B.2 Sources of optical cements:	343
Appendix C Relative Glass Costs and Cross References	345
Appendix D Cleaning Optical Elements	353
Appendix E Conversion Factors	355
E.1 Units of time and angle	355
E.2 Units of length	355
E.2.1 English units to metric:	355
E.2.2 Metric units to English:	355
E.3 Units of volume	356
E.3.1 English units to metric:	356
E.3.2 Metric units to English:	356
E.4 Units of weight	356
E.4.1 English units to metric:	356
E.4.2 Metric units to English:	356
E.5 Units of Temperature	356
E.5.1 English units to metric:	356
E.5.2 Metric units to English:	356
E.6 Conversion technique	357
Appendix F Structural Considerations	359
F.1 Structural Strength	359
F.1.1 Modulus of Elasticity	361
F.1.2 Second Moment of Area (I)	361
F.1.3 Pipe Fitting Mountings	364

x Table of Contents

F.2 Beam Deflection	365
F.3 Balance	367
F.4 Deflection and Vibration.....	368
F.4.1 Gravity Load	370
F.4.2 Bump Load	372
Appendix G List of Common Symbols	377
Glossary	379
Bibliography	385
Index.....	389
