

Table of Contents

Foreword	ix
Acknowledgements	xi
Preface	xiii
Chapter 1 – Overview	1
1.1 What are String Telescopes?	1
1.2 Stabilizing Columns Using Guy Wires	2
1.3 Classifying String Telescope Structures	2
1.4 Preparation before You Begin	5
1.4.1 Define Your Goals	5
1.4.2 Survey Existing Products	7
1.4.3 Understand Relevant Engineering and Technologies	7
1.5 How to Use This Book	8
1.5.1 Selecting a Design	8
1.5.2 Essential Construction Methods	9
1.5.3 Evaluating Performance	9
1.6 Design Tools	10
1.7 Construction Tools	10
Chapter 2 – Basic Principles of String Telescopes	13
2.1 The Idealized String Telescope	13
2.1.1 Vertical Planar String Substructure Subjected to Vertical Load	13
2.1.2 Horizontal Planar String Substructure Subjected to Vertical Load	15
2.2 The Idealized Model Meets the Real World	17
2.2.1 Vertical Planar String Substructure Subjected to Vertical Load	17
2.2.2 A Metric for Pre-Stressing Effectiveness	20
2.2.3 Horizontal Planar String Substructure Subjected to Vertical Load	21
2.2.4 Effectiveness of Pre-Stressing Horizontal Planar String Substructure	23
2.2.5 Substructure Deflections versus Elevation Angle	24
2.3 Summary	25

Chapter 3 – String Telescopes with Planar Substructures	27
3.1 TOA Using Four Planar String Substructures	27
3.1.1 Vertical TOA Subjected to Vertical Load	28
3.1.2 Horizontal TOA Subjected to Vertical Load	30
3.1.3 TOA Deflection versus Elevation Angle	32
3.1.4 Lateral Deflections	34
3.1.5 Rotational Deflections of the UOA	36
3.1.5.1 Non-Axial Rotation with Vertical TOA	36
3.1.5.2 Axial Rotation with Horizontal TOA	39
3.1.5.3 Non-Axial Rotation with Horizontal TOA	41
3.1.6 Relative Magnitude of Planar String Substructure Deflections . .	43
3.2 TOAs Using Four Pairs of Planar Guy Wires.	44
3.3 TOA Using Three Planar String Substructures.	47
3.3.1 TOA Deflection versus Elevation Angle	47
3.3.2 Lateral Deflections	49
3.3.3 Comparison Between TOAs Using Three or Four Planar String Substructures	50
3.4 TOAs Using Three Pairs of Planar Guy Wires.	51
3.5 TOA Using Three Pairs of Angled Planar Guy Wires	52
3.5.1 Deflections Perpendicular to the TOA Axis.	53
3.5.2 Forces Generated by Angled Pairs of Planar Guy Wires	55
3.6 Other Structure Forces	56
3.7 Summary	60
Chapter 4 – String Telescopes with Non-Planar Substructures	61
4.1 Non-Planar Substructures	61
4.1.1 Vertical Non-Planar String Substructure Subjected to Vertical Load	62
4.1.2 Horizontal Non-Planar String Substructure Subjected to Vertical Load	63
4.2 TOA Using Four Non-Planar String Substructures	65
4.2.1 Vertical TOA Subjected to Vertical Load	65
4.2.2 Horizontal TOA Subjected to Vertical Load	67
4.2.3 TOA Deflection versus Elevation Angle	69
4.2.4 Lateral Deflections	70
4.2.5 Rotational Deflections of the UOA	72
4.2.5.1 Non-Axial Rotation with Vertical TOA	72
4.2.5.2 Axial Rotation with Horizontal TOA	75
4.2.5.3 Non-Axial Rotation with Horizontal TOA	77
4.2.6 Relative Magnitude of Non-Planar String Substructure Deviations.	78
4.3 TOA Using Two Non-Planar String Substructures	78
4.4 TOAs Using Three Non-Planar String Substructures.	80
4.4.1 Horizontal TOA Subjected to Vertical Load	81
4.4.2 Lateral Deflections	82

4.4.3 Effectiveness of Pre-Stressing Horizontal TOA.	83
4.4.4 Deflection Comparison of TOAs Using Three and Four Non-Planar String Substructures.	83
4.4.5 TOA Using Three Modified Non-Planar String Substructures . .	84
4.4.6 TOA Using Three Alternative Non-Planar String Substructures. 87	
4.4.6.1 Horizontal TOA Subjected to Vertical Load	88
4.4.6.2 Lateral Deflections.	89
4.4.6.3 Effectiveness of Pre-Stressing Horizontal TOA	90
4.5 Radial Forces	90
4.6 Summary	93
Chapter 5 – Selection and Testing of Guy Wires.	95
5.1 Guy Wire Candidates	95
5.1.1 Steel Wire Rope	95
5.1.1.1 Cable Stretch	97
5.1.1.2 Selection Criteria and Availability.	99
5.1.1.3 Sample Selection and Preparation	100
5.1.2 High Modulus Polymers.	101
5.1.2.1 Stretch, Stress Relaxation, and Creep	103
5.1.2.2 Selection Criteria and Availability.	104
5.1.2.3 Fiber Ropes	107
5.1.2.4 Sample Selection and Preparation	108
5.2 Test Systems	111
5.2.1 Test System 1 — Applied Stress	112
5.2.1.1 Determining Elongation.	115
5.2.1.2 Corrections — Wall Flexure	119
5.2.1.3 Corrections — Thermal Expansion	120
5.2.1.4 Determining the Coefficient of Thermal Expansion . .	124
5.2.2 Test System 2 — Applied Strain	124
5.2.2.1 Determining Elongation.	128
5.2.2.2 Corrections — Support Structure Flexure	129
5.2.2.3 Corrections — Thermal Expansion	133
5.2.2.4 Determining the Coefficient of Thermal Expansion . .	134
5.3 Experimental Results	134
5.3.1 Wire Rope.	134
5.3.1.1 Elongation — Applied Stress.	134
5.3.1.2 Elongation — Applied Strain.	137
5.3.1.3 Stress Relaxation/Creep.	138
5.3.1.4 Thermal Expansion — Applied Stress.	139
5.3.2 High Modulus Polymers.	141
5.3.2.1 Elongation — Applied Stress.	142
5.3.2.2 Elongation — Applied Strain.	146
5.3.2.3 Thermal Expansion — Applied Stress.	149
5.3.2.4 Thermal Expansion — Applied Strain.	151
5.4 Summary	154

iv Table of Contents

5.4.1 Steel Wire Rope	155
5.4.2 Bowstring Yarn	156
5.4.3 12-Strand Fiber Rope	157
5.4.4 Conclusions and Recommendations.	157
Chapter 6 – Testing of String Telescope Structures	159
6.1 Test Fixture and Method	159
6.2 Results - Agreement between Experiment and Theory	166
6.2.1 Example 1 — TOA Using Four Non-Planar String Substructures	166
6.2.2 Example 2 — TOA Using Two Non-Planar String Substructures	167
6.2.3 Example 3 — TOA Using Three Non-Planar String Substructures	169
6.2.4 Example 4 — TOA Using Three Modified Non-Planar String Substructures	171
6.2.5 Example 5 — TOA Using Three Alternative Non-Planar String Substructures	173
6.2.6 Example 6 — TOA Using Three Angled Planar Guy Wire Pairs.	175
6.3 Summary	177
Chapter 7 – Design Guidelines.	179
7.1 TOA Stiffness	179
7.1.1 Criteria for Structure Deflection.	180
7.1.2 Static Stiffness	181
7.1.3 Dynamic Stiffness	182
7.2 Comparison between Planar and Non-Planar Substructures	184
7.3 Comparison among Non-Planar Substructures	187
7.4 Requirements for Pre-stressing TOAs	191
7.4.1 Configuration Geometry.	191
7.4.2 Guy Wire Stiffness versus Stress	193
7.4.3 Strut Resistance to Buckling	194
7.4.4 Temperature Dependence.	195
7.4.5 Stressing Structures Using Springs	196
7.5 Connection Practices.	197
7.6 Structure Vibrations	198
7.6.1 Guy Wire Vibration	198
7.6.2 Strut Vibration	199
7.6.3 TOA Vibration	199
7.6.4 Comparisons.	200
Chapter 8 – 10-inch <i>f</i>/5 String Telescope	203
8.1 Introduction and Goals	203
8.1.1 Design Scope	203
8.1.2 Goals and Specifications	203

8.2	Design	205
8.2.1	Overview of the Completed Telescope	205
8.2.2	Calculating Deflections	207
8.2.3	Strut and Guy Wire Substructures	209
8.2.4	Optical Design	212
8.2.4.1	Primary Mirror	212
8.2.4.2	Primary Mirror Support	213
8.2.4.3	Telescope Optical Assembly	218
8.2.5	Eyepiece Height and Location	219
8.2.6	Balancing the TOA — Horizontal	221
8.2.7	Altitude Bearings	223
8.2.8	Balancing the TOA — Vertical	223
8.2.9	Altazimuth Assembly (Rocker Box)	224
8.3	Telescope Construction.	226
8.3.1	Upper Optical Assembly	227
8.3.1.1	Drum Shell.	227
8.3.1.2	Bottom End Ring	227
8.3.1.3	Focuser and Finder Reinforcements	230
8.3.1.4	Hole for Focuser Drawtube	230
8.3.1.5	UOA Connection Brackets	231
8.3.2	Primary Mirror Cell	232
8.3.2.1	Triangular Frame	232
8.3.2.2	Mirror Cell Assembly	233
8.3.2.3	Gluing the Cell to the Primary Mirror	235
8.3.3	Lower Optical Assembly — Mirror Box	236
8.3.3.1	Mirror Box Top and Bottom Panels.	236
8.3.3.2	Mirror Box Sides	238
8.3.3.3	Assembling the Mirror Box Panels	238
8.3.3.4	Outside Corner Brackets	240
8.3.3.5	Top Corner Plates	240
8.3.3.6	Checking Fit.	242
8.3.3.7	Mirror Box Cover	242
8.3.3.8	Installing the Primary Mirror.	242
8.3.4	Struts.	243
8.3.5	Guy Wires.	244
8.3.6	Assembling the TOA	244
8.3.7	Altitude Bearings	245
8.3.8	Rocker Box.	251
8.3.8.1	Vertical Panels	251
8.3.8.2	Bottom Panel	252
8.3.8.3	Assembling the Rocker Box	253
8.3.8.4	Teflon Pads	254
8.3.8.5	The Ground Board	254
8.3.9	Finishing.	256

vi Table of Contents

8.4	Comments and Suggestions	257
8.4.1	Use	257
8.4.2	Personal Satisfaction, Ergonomics, Convenience	259
8.4.3	Transport and Storage	260
8.4.4	Construction	260
Chapter 9	– 12.5-inch $f/4$ String Telescope	263
9.1	Introduction and Goals	263
9.1.1	Design Scope	263
9.1.2	Goals and Specifications	263
9.1.3	Airline Travel Requirements	265
9.2	Design	267
9.2.1	Overview of the Completed Telescope	267
9.2.2	Calculating Deflections	272
9.2.3	Strut and Guy Wire Substructures	274
9.2.4	Optical Design	276
9.2.4.1	Primary Mirror	276
9.2.4.2	Primary Mirror Support	276
9.2.4.3	Telescope Optical Assembly	280
9.2.5	Eyepiece Height and Location	282
9.2.6	Balancing the TOA – Horizontal	283
9.2.7	Altitude Bearings	283
9.2.8	Balancing the TOA – Vertical	284
9.2.9	Altazimuth Assembly (Rocker Box)	285
9.3	Telescope Construction	287
9.3.1	Lower Optical Assembly	288
9.3.1.1	Top and Bottom Rings	288
9.3.1.2	LOA Sides	291
9.3.1.3	Assembling the LOA – Phase I	292
9.3.1.4	Assembling the LOA – Phase II	294
9.3.2	LOA Mounting Brackets	298
9.3.3	Primary Mirror Cell	300
9.3.3.1	Triangular Frame	300
9.3.3.2	Rocker bars	304
9.3.3.3	Mirror Cell Assembly	305
9.3.3.4	Gluing the Cell to the Primary Mirror	306
9.3.3.5	LOA Cover	307
9.3.3.6	Installing the Primary Mirror	308
9.3.4	Guy Wires	308
9.3.5	Struts	308
9.3.6	Upper Optical Assembly	310
9.3.6.1	Tube Reinforcements	310
9.3.6.2	Mounting the Focuser	313
9.3.6.3	Bottom End Ring	313
9.3.6.4	UOA Mounting Brackets	315

9.3.6.5 Baffles	316
9.3.7 Intermediate Ring	318
9.3.8 Assembling the TOA	319
9.3.9 Altitude Bearings	320
9.3.10 Rocker Box	325
9.3.10.1 Left and Right Side Panels	325
9.3.10.2 Front and Rear Panels	327
9.3.10.3 Bottom Panel	328
9.3.10.4 Assembling the Rocker Box	328
9.3.10.5 Teflon Pads	331
9.3.10.6 The Ground Board	332
9.3.11 Finishing	333
9.4 Comments and Suggestions	333
9.4.1 Use	334
9.4.2 Personal Satisfaction, Ergonomics, Convenience	335
9.4.3 Transport and Storage	335
9.4.4 Construction	336
Appendix A – Recording and Analyzing Vibration Data	337
A.1 Introduction	337
A.2 The Slam Stick	337
A.3 Vibration Analysis	338
A.3.1 Basic Model of Structural Vibration	339
A.3.2 Vibrating Systems in Telescopes	340
A.3.3 Accelerometer Sensitivity versus Frequency	342
A.3.4 The Fourier Transform	342
A.4 Test System and Protocol	345
A.4.1 Configuring the Slam Stick	346
A.4.2 Mounting the Slam Stick to a Telescope	346
A.4.3 Refractor on Altazimuth Mount	348
A.4.4 Applying the Impulse	348
A.5 Results	349
A.5.1 Mount Response to Horizontal Impulse	350
A.5.2 Mount Response to Vertical Impulse	350
A.5.3 Effectiveness of Vibration Damping Pads	352
A.6 Summary	358
Appendix B – Vibrations in 10-inch <i>f</i>/5 String Telescope	361
B.1 Vibrations in String Telescopes	361
B.1.1 Configuring the Slam Stick	361
B.1.2 Mounting the Slam Stick to the Telescope	362
B.2 Vibrations of Individual Struts	362
B.3 Vibrations of the Secondary Mirror Mount	364
B.4 Vibrations of Individual Guy Wires	366
B.5 Guy Wire Tension versus Temperature	370

B.6 Full Structure Tests	370
B.6.1 Telescope Vibrations Measured at Secondary Mirror Mount ..	371
B.6.2 Telescope Vibrations Measured at Focuser	372
B.6.2.1 Vibrations of TOA Oriented Vertically	375
B.6.2.2 Vibrations of TOA versus Elevation Angle	375
B.6.2.3 Orientation of Ground Board	376
B.6.2.4 Altitude Bearing Brace	378
B.7 Summary	380
Appendix C – Fabrication of Continuous Loop Strings	383
C.1 Guy Wires Versus Bowstrings	383
C.2 Basic Skills	383
C.3 String Jigs	384
C.4 Winding the Yarn	388
C.5 Serving Tools and Materials	389
C.6 Loop Serving	390
C.6.1 Beginning the Loop Serving	391
C.6.2 Filling the Serving	392
C.6.3 The Whip End	393
C.6.4 Serving the Second Loop	396
C.6.5 Twist	397
C.6.6 Closing Loop Ends	398
C.7 Center Serving	399
C.8 Waxes	399
C.9 Comments and Suggestions	400
Appendix D – Vibrations in 12½-inch <i>f</i>/4 String Telescope	403
D.1 Vibrations in String Telescopes	403
D.1.1 Configuring the Slam Stick	403
D.1.2 Mounting the Slam Stick to the Telescope	404
D.2 Vibrations of Individual Guy Wires	405
D.3 Vibrations of Individual Struts	407
D.4 Vibrations of the Secondary Mirror Mount	408
D.5 Full Structure Tests	411
D.5.1 Telescope Vibrations Measured at Focuser	411
D.5.1.1 Vibrations of TOA versus Elevation Angle	412
D.5.1.2 Ground Board Orientation and Altitude Bearing Brace	414
D.5.2 Telescope Vibrations Measured at Secondary Mirror Mount ..	414
D.5.3 Observations at the Eyepiece	415
D.6 Summary	417
Index	419
