

# Table of Contents

<b>Foreword</b> .....	<b>xi</b>
<b>Issue 1</b> .....	<b>1</b>
<b>1.1 The Houghton Telescope: An Optimum Compromise?</b> .....	<b>1</b>
1.1.1 Requirements for an Optimum Compromise .....	1
1.1.2 Possible Instruments .....	2
1.1.3 Enter the Houghton .....	4
1.1.4 Optical Performance .....	4
1.1.5 Diagonal Mirror Size .....	5
1.1.6 Conclusion .....	7
<b>1.2 The World of Unobstructed Reflecting Telescopes</b> .....	<b>7</b>
1.2.1 Telescope Design .....	8
1.2.2 Telescope Designs .....	11
1.2.3 Future Designs .....	16
1.2.4 Conclusion .....	18
<b>1.3 An Innovative 17.5-Inch Binocular</b> .....	<b>19</b>
1.3.1 The Mount .....	21
1.3.2 The Mirror Cradle and Cells .....	21
1.3.3 The Secondary-Tertiary Head Assembly .....	22
1.3.4 A Multi-Mirror Telescope .....	23
1.3.5 Conclusion .....	23
<b>1.4 A Schupmann Medial Telescope For the Serious Observer</b> ....	<b>23</b>
1.4.1 The Objective .....	24
1.4.2 The Field Mirror .....	24
1.4.3 The Corrector .....	25
1.4.4 Glass Purchase .....	26
<b>1.5 ATM Journal Staff</b> .....	<b>29</b>
1.5.1 Introducing the ATMJ Staff .....	29
1.5.2 Richard A. Buchroeder .....	30
1.5.3 William J. Cook .....	31
1.5.4 John Gregory .....	33
1.5.5 Diane Lucas .....	35
1.5.6 Harrie G. J. Rutten .....	36
1.5.7 Martin van Venrooij .....	38
<b>Issue 2</b> .....	<b>41</b>
<b>2.1 A 17.5-Inch Wood and Aluminum Split-Ring Telescope</b> .....	<b>41</b>

**iv Table of Contents**

2.1.1 Lower Tube, Key to Mount Size	41
2.1.2 Tubular Truss and Rotation Ring	43
2.1.3 Rotating Upper Tube	44
2.1.4 Down-Sized Diagonal	44
2.1.5 Split-Ring	44
2.1.6 Cradle	45
2.1.7 The Base	46
2.1.8 North and South Bearings for RA	47
2.1.9 Setting Circles	47
2.1.10 Weight Data	48
2.1.11 References	48
<b>2.2 Industrial Fabrication of Small Lenses</b>	<b>49</b>
2.2.1 Generation	49
2.2.2 Grinding	51
2.2.3 Polishing	52
2.2.4 About the Author	54
<b>2.3 Front-Loaded Collimation</b>	<b>54</b>
<b>2.4 Four-Collimation-Point Mirror Cell</b>	<b>56</b>
2.4.1 Side-to-Side Mirror Alignment	57
2.4.2 Four-Point Collimation Adjustment	57
2.4.3 Making the Cell Removable	59
2.4.4 Mirror Spotting	60
2.4.5 Conclusion	61
<b>2.5 Sub-Aperture Maksutov Correctors</b>	<b>61</b>
2.5.1 Design No. 1	61
2.5.2 Design No. 2	62
2.5.3 Design No. 3	62
2.5.4 Design No. 4: Field Visual	64
2.5.5 Design No. 5: Field Photo-Visual	64
2.5.6 Design No. 6: Field Photo-Visual, $f/7$	64
2.5.7 General Remarks on the Specifications	65
<b>2.6 Easy Finder Alignment</b>	<b>68</b>
<b>2.7 The Perfect Telescope Is...</b>	<b>69</b>
2.7.1 Cost	69
2.7.2 Aperture and Portability	69
2.7.3 Aperture	70
2.7.4 Optical Performance	70
<b>Issue 3</b>	<b>71</b>
<b>3.1 The Stevick-Paul Off-Axis Reflecting Telescope</b>	<b>71</b>
3.1.1 How to Make a Stevick-Paul Telescope	72
3.1.2 Summary	77
3.1.3 References	78
<b>3.2 A New Equatorial Platform Design</b>	<b>79</b>
3.2.1 How it Works	79

3.2.2 Test Mount .....	81
3.2.3 Appendix .....	82
<b>3.3 The 1993 Texas Star Party     and Riverside Conference.....</b>	<b>86</b>
3.3.1 On to Riverside .....	89
<b>3.4 The Eye and the Use of Telescope Optics, Part I.....</b>	<b>93</b>
<b>3.5 A Photographic Tele-Compressor For Newtonians.....</b>	<b>98</b>
3.5.1 Design .....	99
3.5.2 Performance .....	101
3.5.3 Construction .....	101
3.5.4 Proposed Tele-compressors for Fast Newtonians .....	101
<b>3.6 Buried Gold in that Old SCT.....</b>	<b>101</b>
3.6.1 Reduced Central Obstruction .....	102
3.6.2 Additional Tips for Improving Telescope Performance ..	104
<b>3.7 Q and A For the Telescope Maker.....</b>	<b>105</b>
3.7.1 As for the Glass Itself .....	106
<b>3.8 From the Bench.....</b>	<b>108</b>
<b>3.9 The Perfect Telescope Is a 20 X 80 Binocular .....</b>	<b>111</b>
<b>Issue 4 .....</b>	<b>113</b>
<b>4.1 A 17.5-inch Telescope That is Easy to Set Up.....</b>	<b>113</b>
<b>4.2 Improve Your Telrad .....</b>	<b>116</b>
4.2.1 Radio Shack parts: .....	117
<b>4.3 The Houghton-Cassegrain Telescope .....</b>	<b>117</b>
4.3.1 Discovering The Houghton .....	117
4.3.2 Exploring Various Designs .....	118
4.3.3 Enter ZEMAX .....	118
4.3.4 The Sigler-Houghton .....	119
4.3.5 Designing the Cook-Houghton Planetary Telescope .....	119
4.3.6 Here and Now .....	120
4.3.7 The Down Side .....	120
4.3.8 The Cost of the Glass .....	120
4.3.9 The Central Obstruction .....	122
4.3.10 Testing the Corrector .....	123
4.3.11 Conclusion .....	123
4.3.12 Additional Reading .....	124
<b>4.4 Astrofest 1993 .....</b>	<b>124</b>
4.4.1 Astrofest 1993 Merit Awards .....	131
<b>4.5 The Krupa Collimator .....</b>	<b>132</b>
<b>4.6 The Eye and the Use of Telescope Optics, Part II .....</b>	<b>133</b>
<b>4.7 Letter to the Editor .....</b>	<b>139</b>
4.7.1 Eye Relief vs. Field of View .....	139
<b>4.8 Instant Wavefront Analysis .....</b>	<b>140</b>
<b>4.9 A “Sidereal Hinge” Equatorial Platform .....</b>	<b>144</b>
4.9.1 Construction Notes: .....	148

vi **Table of Contents**

4.9.2 Conclusion .....	150
4.9.3 Addendum .....	150
<b>4.10 From the Bench: Binoculars and Optical Coatings.....</b>	<b>151</b>
<b>Issue 5 .....</b>	<b>153</b>
<b>5.1 Building a Split-Ring Porter Equatorial.....</b>	<b>153</b>
<b>5.2 A 200 mm <i>f</i>/4 Houghton Telescope .....</b>	<b>163</b>
5.2.1 Making the Corrector Lenses .....	165
5.2.2 Construction of the Telescope .....	166
5.2.3 Provisions for Collimation .....	169
5.2.4 Mounting and Drive .....	169
5.2.5 A Summary of the Main Characteristics: .....	170
<b>5.3 A Reclining Chair Binocular Mount.....</b>	<b>170</b>
5.3.1 Parts List .....	176
<b>5.4 An Illuminated Viewer-Magnifier for Star Charts .....</b>	<b>177</b>
<b>5.5 Telescopes For CCD Imaging .....</b>	<b>180</b>
<b>5.6 Baffling Baffles .....</b>	<b>183</b>
5.6.1 Enter the Baffle .....	183
5.6.2 A Simple Solution .....	183
5.6.3 Cutting the Baffles .....	184
5.6.4 Placement of the Baffles .....	185
5.6.5 Assembly .....	185
<b>5.7 The Maksutov Telescope: Past and Present.....</b>	<b>186</b>
5.7.1 The Invention .....	186
5.7.2 Theory Becomes Reality: A Chronology .....	187
<b>5.8 From the Bench Binocular Collimation, Part I .....</b>	<b>191</b>
<b>5.9 Viewpoint.....</b>	<b>192</b>
5.9.1 Additional Reading .....	193
<b>Issue 6 .....</b>	<b>195</b>
<b>6.1 Riverside 1994 .....</b>	<b>195</b>
<b>6.2 Impressions of Riverside 1994 .....</b>	<b>202</b>
<b>6.3 Telescopes for Observing Planets .....</b>	<b>205</b>
6.3.1 Image Contrast .....	207
6.3.2 Secondary to Focal Point .....	210
6.3.3 Secondary Diameter Determined by Image Size .....	210
6.3.4 Reduced Secondary Mirror Size .....	211
6.3.5 Telescope Modifications .....	212
6.3.6 Modifications for Schmidt-Cassegrains (SCT) .....	213
6.3.7 Offset Newtonian Secondary Mirror .....	216
6.3.8 Apodizing Screens and Other Devices to Reduce Spider Diffraction Spikes .....	218
<b>6.4 Techniques and Hints for Lunar and Planetary Observing ..</b>	<b>218</b>
6.4.1 The Atmosphere .....	219
6.4.2 Site Selection .....	219

6.4.3 The Telescope	221
6.4.4 Tube Currents	221
6.4.5 Focal Ratio	222
6.4.6 Newtonian Diagonal Size	223
6.4.7 Collimation	223
<b>6.5 Texas Star Party 1994</b>	<b>225</b>
<b>6.6 Much Better Bearings</b>	<b>226</b>
<b>6.7 Telescopes for CCD Imaging, Part II</b>	<b>227</b>
<b>6.8 A Closer Look at High Magnification</b>	<b>229</b>
<b>6.9 From the Bench Binocular Collimation, Part II</b>	<b>235</b>
6.9.1 Eccentric Ring Alignment	235
6.9.2 Push-Pull Alignment	237
6.9.3 Three-Point Objective Alignment	237
<b>Issue 7</b>	<b>241</b>
<b>7.1 Too Many Diffraction Rings</b>	<b>241</b>
<b>7.2 Stellafane 1994</b>	<b>243</b>
7.2.1 Evening Program	244
7.2.2 The Background on Peter Hirtle's Tri-Schiefspiegler	246
7.2.3 Merit Awards Stellafane 1994	248
<b>7.3 The Perfect Telescope Is</b>	<b>249</b>
<b>7.4 Astrofest 1993</b>	<b>251</b>
7.4.1 Merit Award Recipients	258
